Attention: Mr. Mark Verhey, C.E.G.

Subject: HCDEH Response Letter; Pete's Service
1409 Main Street, Fortuna, California; LOP No. 12517

Dear Mark:

This letter is in response to correspondence from the Humboldt County Division of Environmental Health (HCDEH) dated October 21, 2005. Pursuant to your letter, LACO ASSOCIATES (LACO) will recommend the mobile laboratory use EPA Method 8260 for analysis of MTBE in soil, rather than EPA Method 8021, if possible. Additionally, the selected contractor will be advised not to excavate areas that were previously excavated.

Please call if you have any questions or require additional information.

Sincerely,
LACO ASSOCIATES

Timothy D. Nelson
Project Manager
